

Company Overview

Virtual Computer is the market leader in intelligent desktop virtualization, combining centralized management with local execution. The company's flagship product, Virtual Computer NxTop, makes managing thousands of desktops and laptops as easy as managing one, while offering new levels of flexibility and productivity to end-users. NxTop delivers ultra-fast native PC performance, complete mobility, and better manageability than VDI for a fraction of the cost. More information is available at www.virtualcomputer.com.

Partners

Awards
